## Microbiological Laboratory Test Report

|                         |  |                             |              |
|-------------------------|--|-----------------------------|--------------|
| Sample ID:              | 205541                                 | Date of Report Issuance:    | 4 Feb 2026   |
| Name:                   | Chicken Powder                         | Limit/Cut-off value:        | 20 PPM       |
| Category:               | Product                                | Sampling date Lab:          | 4 Feb 2026   |
| Production Location:    | Factory                                | Test Date:                  | 4 Feb 2026   |
| Temperature Conditions: | 25-30 ± 3 C°                           | Sample Size:                | 75g          |
| Humidity Conditions:    | 40-60 %                                | Product Batch Number:       | 2026S266     |
| Test Kit Lot:           | 1000091432                             | Product Manufacturing Date: | 18 Jan 2026  |
| Test method:            | Gluten G12 rapid test kit - LFD method | Product Expiry Date:        | 18 Jan 2027  |
|                         |  | Sample Specification Group: | Spice Blends |

| Sr. No | Parameter | Method                    | LOQ    | UOM | Result | Remarks                               |
|--------|-----------|---------------------------|--------|-----|--------|---------------------------------------|
| 1      | Gluten    | Gluten G12 Rapid Test Kit | 20 PPM | PPM | Absent | No colour line observed on test strip |

Note: UoM = unit of measurement, ppm = parts per million

### Evidence Photos:

Comments/Remarks: No colour line was observed on the test strip. This indicates that gluten was not detected in the sample and is below the cut-off value of 20 ppm

Analysed by: Microbiologist  
Muhammad Ammar

Verified by: Managing Director & Food Safety Head  
Sudais Asif

Head office: 272/H2 opposite Emporium Mall Gate #1, Johar Town, Lahore  
Factory: Muzamal Town opposite Police Training College, Chung, Lahore
